

Dear Parents,

This year we have been using an exciting new educational game called Prodigy. While we will be using the program during school hours, students are encouraged to use it at home as a way of supplementing their practice!

## Learn at home!

Have you ever wished your child was as enthusiastic about learning as they are about video games? With Prodigy, your child can continue their learning at home, exactly where they left off at school. It takes less than 2 minutes to get started:

1. Visit [www.prodigygame.com](http://www.prodigygame.com), and click on the orange “Start Now. Free Forever.” button,
2. Enter your information to create a free Parent account,
3. Click on the orange “Add Students” button and select “Add Existing Students”,
4. Enter your child’s username and password (ask your child for this or see below),
5. Click on the orange “Play Prodigy” button in the top right to access the game.

## Real-time Reports

Prodigy provides you rich, real-time reports on what your child is learning. This makes it easy to track what math skills they’ve mastered, and where they may need help. To access reports:

1. Click on the blue “Teacher/Parent Login” button on [www.prodigygame.com](http://www.prodigygame.com) to access your parent account (see ‘Learn at Home’ above),
2. Click on the “Reports” tab and select one of our four reports.

## Accelerate Your Child’s Learning (Optional)

Tutoring programs or private tutors can cost hundreds of dollars a month, and don’t feel like a game. Prodigy offers a Premium Membership with enriched game features (such as faster progression, member exclusive items, and enhanced pet development) starting at less than \$5/month.

On average, Premium Members master 92% more math skills than non-members:

1. Sign into your Parent Account on [www.prodigygame.com](http://www.prodigygame.com) by clicking the blue “Teacher/Parent Login” button (see ‘Learn at Home’ above),
2. Click on the “Upgrade” tab and select your membership.

Purchasing the game is completely optional and at your discretion.

Happy learning!
