

Human Growth and Development

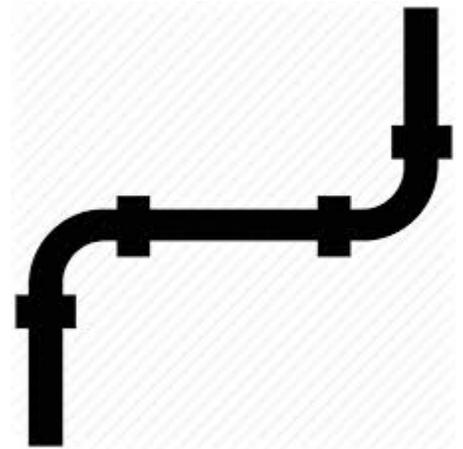

1. What is the pouch that holds the testicles, just beneath the penis?

- (A) Scrotum
- (B) Seminal Vesicles
- (C) Vas Deferens
- (D) Testes

2. The tube that carries urine from the bladder out of the body. In males, semen also exits the body through it, although never at the same time.

- (A) Bladder
- (B) Penis
- (C) Vas deferens
- (D) Urethra

3. This is a part of the male reproductive system.

- (A) Cervix
- (B) Vas deferens
- (C) Uterus
- (D) Motorcycles

4. Sperm (male reproductive cell) are made in:

- (A) Pituitary glands
- (B) Scrotum
- (C) Testicles
- (D) Factories

5. A nocturnal emission is sometimes called this:

- (A) Menstruation
- (B) A wet dream
- (C) Conception
- (D) Contraceptive

6. The surgical procedure to remove the foreskin from the male's penis is called

- (A) Libido
- (B) Circumcision (a circular incision)
- (C) Monogamy
- (D) Sex drive

7. This is a walnut-sized, male gland that surrounds the urethra and adds fluid to the semen.

- (A) Pituitary gland
- (B) Thyroid gland
- (C) Mammary gland
- (D) Prostate gland

WALNUT

8. After conception, how much time must pass for the fetus to fully develop in the womb?

- (A) 3 months
- (B) 7 months
- (C) 9 months (40 weeks)
- (D) 18 years

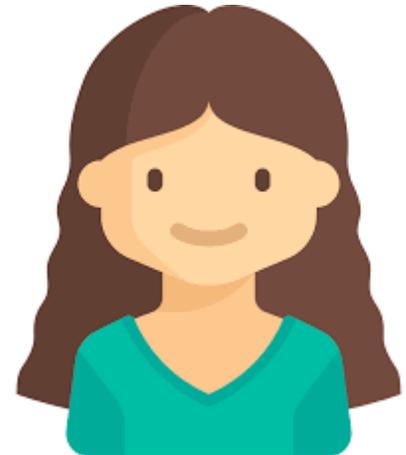

9. Also called an ovum, it's the female reproductive cell

- (A) Fetus
- (B) Uterus
- (C) Ovary
- (D) Egg

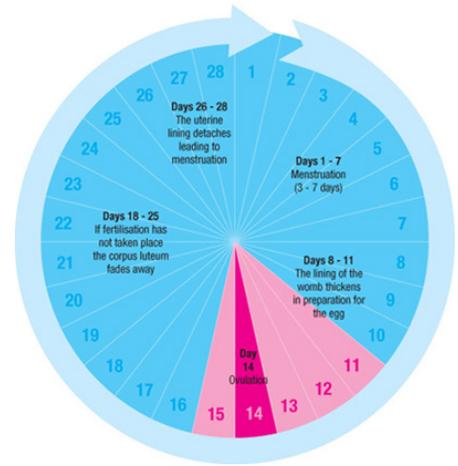

10. This is a part of the female reproductive system.

- (A) Prostate gland
- (B) Fallopian tubes
- (C) Scrotum
- (D) Circumcision

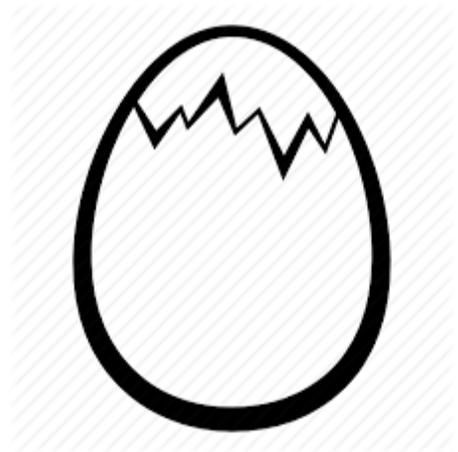

11. An average menstrual cycle is:

- (A) 28 days
- (B) 3 days
- (C) 13 days
- (D) unknown

12. Ovum (eggs - female reproductive cell) are produced in the:

- (A) Testes
- (B) Prostate gland
- (C) Cervix
- (D) Ovaries

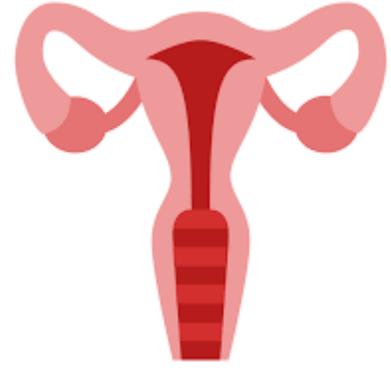

13. In the process of implantation, the embryo embeds itself deep into the:

- (A) Endometrium
- (B) Fallopian tubes
- (C) Cervix
- (D) Scrotum

14. This is located at the base of the uterus (womb):

- (A) Scrotum
- (B) Cervix
- (C) Fetus
- (D) Foreskin

15. Another word for menstruation is:

- (A) Menopause
- (B) Abstinence
- (C) Puberty
- (D) Period

16. What happens on the first day of the menstrual cycle?

- (A) One of the eggs starts to mature
- (B) The walls of the uterus begin to thicken with blood, proteins, and nutrients
- (C) The egg passes through the uterus
- (D) Fertilization occurs

17. Women are born with about this many egg cells:

- (A) 0
- (B) 100
- (C) 1000
- (D) 100,000

18. What transports nutrients from the placenta to the embryo?

- (A) Amniotic sac
- (B) Umbilical cord
- (C) Fetus
- (D) Farmer Brown

19. In females, puberty is controlled by these hormones:

- (A) Kawasaki, Honda, Yamaha & Suzuki!
- (B) Estrogen, testosterone and progesteroneestosterone and progesterone
- (C) Testosterone and progesterone
- (D) Estrogen and progesterone

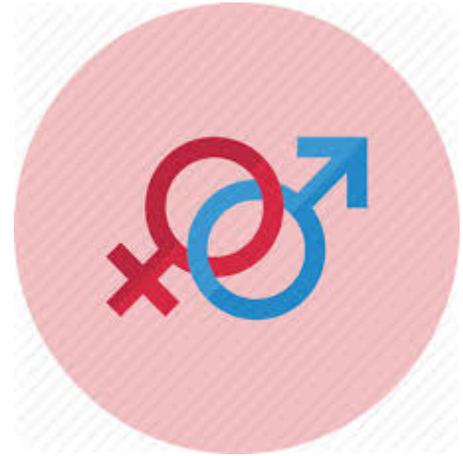

20. What is the pea-sized gland located in the brain that signals the beginning of puberty?

- (A) Ovum
- (B) Pituitary gland
- (C) Pancreas
- (D) Hormones

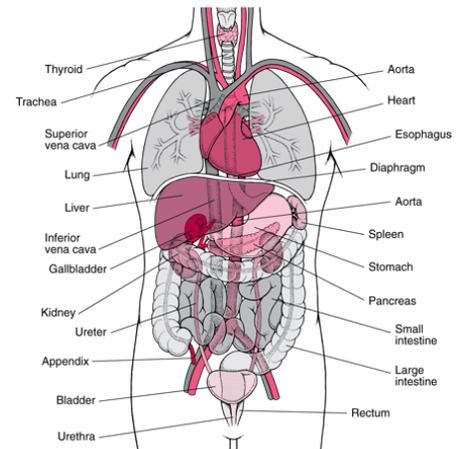

21. During puberty, this happens to BOTH boys and girls:

- (A) Ejaculations begin to occur
- (B) Hair grows under the arms
- (C) Menstruation can begin
- (D) Conception begins

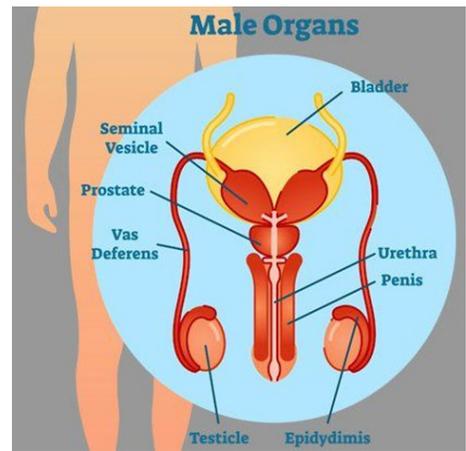

22. The pituitary, thyroid, adrenal, pineal, pancreas, thymus, parathyroid, ovaries (in girls), & testes (in boys) are the main organs in this system.

- (A) The cardiovascular system
- (B) The endocrine system
- (C) The digestive system
- (D) Fuel injection system

23. Sperm mixes with fluids from the seminal vesicles and the prostate gland to form:

- (A) Semen
- (B) Menstrual fluid
- (C) Hormones
- (D) Nutrients

24. Conception occurs when...

- (A) The sperm cell fertilizes the ovary
- (B) You're born
- (C) The sperm cell fertilizes the egg cell
- (D) The sperm cell fertilizes the uterus

25. The egg is considered fertilized when the egg cell and sperm cell have joined together to make a new cell called a ...

- (A) Zygote
- (B) Embryo
- (C) Fetus
- (D) Egg

26.

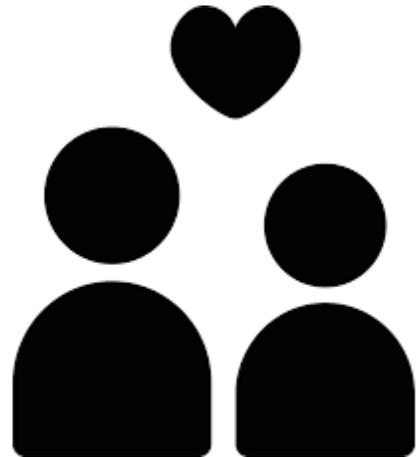

The time between conception and birth is called...

- (A) The gestation period
- (B) The Menstrual cycle
- (C) The Life cycle
- (D) The Motor cycle - Vroom Vroom!

27. The practice of having only one sexual partner is called...

- (A) Monogamy
- (B) Abstinence
- (C) Infertility
- (D) Conception

28. An example of a Sexually Transmitted Infection (STI) includes:

- (A) HIV
- (B) Genital herpes
- (C) HPV
- (D) All of the above

29. AIDS is a disease which affects which system ?

- (A) Immune system
- (B) Cardiovascular system
- (C) Musculoskeletal system
- (D) None of the above

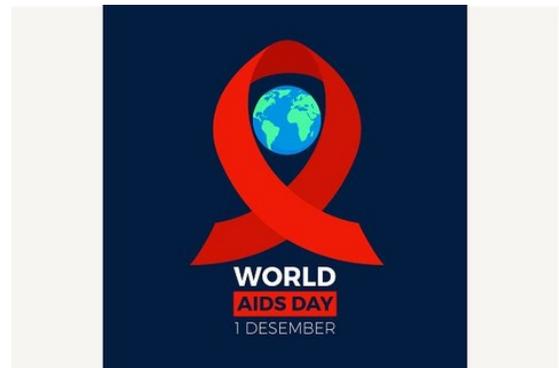

30. Which virus causes aids ?

- (A) HIV
- (B) Herpes
- (C) Hepatitis-C
- (D) Bacteria

31. What is the ONLY way a person can contract the HIV virus?

- (A) Hugging an infected person
- (B) Holding hands with an infected person
- (C) Having the bodily fluids of one person come in contact with the inside of another person's body (unprotected sex, intravenous drug use, from mother to fetus in the womb).
- (D) Sharing a pencil

32. What is the only 100% effective method of birth control?

- (A) Using a condom
- (B) Abstinence
- (C) Using the rhythm method
- (D) Crossing your fingers

33. This is an example of STI

- (A) Arthritis
- (B) Syphilis
- (C) Gingivitis
- (D) All of the above
